Baystone Financial Group is approved to provide financing options under California's GS \$Mart and Lease \$Mart programs. Using lease purchase or a leasing option through GS \$Mart and Lease \$Mart saves time and money typically associated with traditional bidding processes. The use of standardized documentation and competitive pricing makes the financing process easier.

We are able to provide financing for virtually any type of essential equipment which includes fire trucks, ambulances, construction equipment, police vehicles, computers, copiers, road maintenance equipment, phone systems, and many other types of equipment.

What is GS \$Mart & Lease \$Mart?

The Department of General Services Procurement Division established a nationally recognized award winning financing and acquisition program to serve the State of California and local governments. This financial marketplace facilitates purchasing and financing for the State of California and local governments on essential equipment.

The **GS \$Mart** program offers lease purchase equipment whereas the **Lease \$Mart** program offers pure leasing options. All units of state and local government are eligible to participate in these programs.
